

## **SATAN'S UNDERGROUND TRANS-DIMENSIONAL RIFT OPERATIONS (SUTRO)**

**AP - San Francisco** The seemingly innocuous metal construct recently became a suspect as the prime location for invasion from the forces of the dark Overlord. A small group of unknown participants in the Sutro Tower area have recently begun an investigation of the towers integrity and ability to contain the malevolent beings that claw at the towers perimeter defenses. This unnamed group has discovered the ability to physically view the previously clandestine demon hoards. Close monitoring of the towers defensive borders has become an around the clock event.

Breaches throughout the world have been occurring at other rift towers. The greatest break came in the Seattle area where the group dispatched members to track and destroy a band of lesser demons that were small enough to penetrate cracks in the trans-dimensional boundary. Casualties have not been reported from the group as of this writing. Sister groups in Paris, France and Cairo, Egypt have also reported similar events in the past few years.

No formal statement has been released from the group and members remain anonymous. These occurrences are yet to be confirmed by local authorities and are currently being dismissed as a hoax. The group strongly urges any strange events to be reported to the local police department. The group has been monitoring local police activity and once reported, the group will proceed to make individual contact and further evaluate the case.

Extreme caution is advised if confrontation with these demons is unavoidable. Reports from the group describe the massacre of civilians with inexplicable speed and annihilation. The killing ferocity cannot be compared to any known earth predator.

The situation will continue to be followed as the events unfold. It is not known how long the rift can maintain a secure foundation to keep our dimension separated.
